Bayezid Hossain

Aspiring MERN Stack Developer
Lakshmipur District, Chattogram, Bangladesh

Summary

I am Bayezid Hossain, a dedicated and motivated individual with a solid foundation in computer applications and web development.

I have successfully completed a 360-hour Basic Computer Course under the Bangladesh Technical Education Board (BTEB), where I gained hands-on experience in Microsoft Office applications (Word, Excel, PowerPoint), computer hardware fundamentals, and internet operations. This has provided me with a strong technical foundation to support my web development journey.

Currently, I am enhancing my skills in front-end web development, with expertise in HTML, CSS, and JavaScript. My goal is to create modern, responsive, and user-centric websites that provide an optimal experience across all devices.

As I look to the future, my long-term goal is to become a proficient MERN Stack Developer. I am continuously expanding my knowledge in React.js, Express.js, Node.js, MongoDB, and Tailwind CSS to stay up-to-date with the latest industry trends and best practices, ensuring the delivery of high-quality work.

I am open to learning opportunities, collaborations, and projects that allow me to apply my skills, make a meaningful impact, and further advance my career in the field of web development.
